Quiz, 10 questions

Correct

Come from the same distribution

| | Come from different distributions cal aspects of deep learning Question identical to each other (same (x,y) pairs) | 9/10 points (90%) |
|---|---|----------------------|
| | Have the same number of examples | |
| × | 0 / 1 point | |
| | our Neural Network model seems to have high variance, what of the following would mising things to try? | l be |
| | Increase the number of units in each hidden layer | |
| 7 | his should not be selected | |
| | Get more training data | |
| ٦ | his should be selected | |
| | Get more test data | |
| ı | Jn-selected is correct | |
| | Make the Neural Network deeper | |
| 1 | his should not be selected | |
| | Add regularization | |
| (| Correct | |

| for app dev set | Practical aspects of deep learning Ouiz, 1604 assemble on an automated check-out kiosk for a supermarket, and are building a (elassifier for apples, bananas and oranges. Suppose your classifier obtains a training set error of 0.5%, and a dev set error of 7%. Which of the following are promising things to try to improve your classifier? (Check all that apply.) | | | | |
|--------------------|--|--|--|--|--|
| \checkmark | Increase the regularization parameter lambda | | | | |
| Corre | ect | | | | |
| | Decrease the regularization parameter lambda | | | | |
| Un-se | elected is correct | | | | |
| | Get more training data | | | | |
| Corre | ect | | | | |
| | Use a bigger neural network | | | | |
| Un-se | elected is correct | | | | |
| ~ | 1 / 1 point | | | | |
| 5. What is | s weight decay? | | | | |
| | The process of gradually decreasing the learning rate during training. | | | | |
| \bigcirc | Gradual corruption of the weights in the neural network if it is trained on noisy data. | | | | |
| \bigcirc | A technique to avoid vanishing gradient by imposing a ceiling on the values of the weights. | | | | |
| | A regularization technique (such as L2 regularization) that results in gradient descent shrinking the weights on every iteration. | | | | |

| ~ | 1/1 point | | | |
|---------------|--|--|--|--|
| 6. What h | nappens when you increase the regularization hyperparameter lambda? | | | |
| | Weights are pushed toward becoming smaller (closer to 0) | | | |
| Correct | | | | |
| \bigcirc | Weights are pushed toward becoming bigger (further from 0) | | | |
| | Doubling lambda should roughly result in doubling the weights | | | |
| \bigcirc | Gradient descent taking bigger steps with each iteration (proportional to lambda) | | | |
| ~ | 1/1 point | | | |
| 7. With th | ne inverted dropout technique, at test time: | | | |
| | You do not apply dropout (do not randomly eliminate units) and do not keep the 1/keep_prob factor in the calculations used in training | | | |
| Correct | | | | |
| \bigcirc | You apply dropout (randomly eliminating units) but keep the 1/keep_prob factor in the calculations used in training. | | | |
| | You apply dropout (randomly eliminating units) and do not keep the 1/keep_prob factor in the calculations used in training | | | |
| \bigcirc | You do not apply dropout (do not randomly eliminate units), but keep the 1/keep_prob factor in the calculations used in training. | | | |

| Quiz, | , 10 questions | 1 / 1 |
|-------|----------------|-------|
| | | poin |

8.

Increasing the parameter keep_prob from (say) 0.5 to 0.6 will likely cause the following: (Check the two that apply)

Increasing the regularization effect

Un-selected is correct

Reducing the regularization effect

Correct

Causing the neural network to end up with a higher training set error

Un-selected is correct

Causing the neural network to end up with a lower training set error

Correct

1/1 point

).

Which of these techniques are useful for reducing variance (reducing overfitting)? (Check all that apply.)

Gradient Checking

Un-selected is correct

Xavier initialization

Practical aspects of deep learning

Quiz, 10 questions

9/10 points (90%)

| , | • • | | | | |
|------------------------|---|--|--|--|--|
| <u> </u> | L2 regularization | | | | |
| Correct | | | | | |
| | Data augmentation | | | | |
| Correct | | | | | |
| | Exploding gradient | | | | |
| Un-selected is correct | | | | | |
| <u> </u> | Dropout | | | | |
| Correct | | | | | |
| | Vanishing gradient | | | | |
| Un-selected is correct | | | | | |
| | | | | | |
| ~ | 1 / 1 point | | | | |
| 10. Why do | 10. Why do we normalize the inputs x ? | | | | |
| \bigcirc | It makes the parameter initialization faster | | | | |
| \bigcirc | It makes it easier to visualize the data | | | | |
| \bigcirc | Normalization is another word for regularizationIt helps to reduce variance | | | | |
| | It makes the cost function faster to optimize | | | | |
